SECURE MOBILE SHREDDING AND DATA ERASURE SOLUTIONS

SECURE MOBILE SHREDDING AND DATA ERASURE SERVICE

TES-AMM Japan hard drive destruction and secure shredding service has been designed and developed to keep your information confidential and secure. Hard drive destruction and data erasure services is the only secure way to permanently destroy and decommission hard disks.

GROUNDBREAKING SERVICES
THROUGHOUT JAPAN

The complex block features a blue background with a white grid pattern. At the top right is the TES-AMM JAPAN logo, which consists of a stylized blue 'C' shape with a white leaf-like element inside, followed by the text 'TES-AMM JAPAN'. Below the logo, the text 'GROUNDBREAKING SERVICES THROUGHOUT JAPAN' is written in white, bold, uppercase letters. The bottom half of the block is divided into three images: a top-left image showing a shredding machine in operation with a large pile of shredded metal; a bottom-left image showing the interior of a shredding machine with a blue checkered pattern on the left side; and a right-side image showing a gloved hand holding a small amount of shredded metal.

WHY YOU NEED OUR MOBILE SHREDDING SERVICES...

GROUNDBREAKING SERVICES TROUGHOUT JAPAN

Our mobile shredding solutions are designed for that you are able to meet the highest security standards to ensure an all-safe and traceable destruction process, which can even be done (for added security) inside your premises. It also able to process high volumes of IT per day. With the ability to process large quantities of data bearing devices quickly and securely all from within the secure mobile unit further reduces the risk of information leaking.

WHAT WE CAN PROCESS

Data erasure of the following units:

Hard disk drives, USB pens, Mobile phones, laptops, desktops, Server HDD technology.

Shredding the following devices:

HDDs, USB pens, CD's, Mobile phones, DLT tapes

AVOID DATA & IDENTITY THEFT

Disposing of your computers HDD's, CD's, USB pens should not be treated lightly and all measures to safeguard your confidential data should be embraced. Identity theft is on the rise and TES-AMM Japan has invested heavily against this growing threat with our purpose built vehicles and compliancy of our solutions. Our shredding & data erasure specialists will call at your office as frequently or infrequently as required, collect all of your unwanted IT and waste paper and shred it there and then, fully backed with a compliance and completion certificate.

as 5mm Shredder Size

EASY USE IN AN OFFICE ENVIRONMENT

Destruction on site :

within your office or building, to avoid the risk of transport of your sensitive data outside the premises.

Inside your premises:

We can perform our service inside any office because the machine is equipped with castor wheels and fitted brakes to enable swift moving between various workplaces.

Usable in an office environment :

- Electricity: 220-240 V – 50 Hz – 12.2 A (normal electric settings)
- Silently (< 50 dB) measured at the workplace according to norm/measuring method
- Health protection: no emission of dust or hazardous materials

Charge:

Quotation bases - location, volume, equipment type (2.5 Inch HDD or 3.5 inch.....)

Proof of destruction:

If you require proof of destruction, we can provide you with a certificate of the destruction. The certificate will specify date/ time, serial number, destruction settings and will include a picture of the HD being processed.
